

## The Rea<sup>®</sup> Spirea<sup>4</sup><sub>NG</sub>: simply inspired!

Invacare<sup>®</sup> is delighted to announce the launch of the Rea<sup>™</sup> Spirea<sup>4</sup><sub>NG</sub>, a superbly nippy, lightweight foldable wheelchair designed for medium-active users.

This latest model is a fusion of the Spirea<sup>2</sup>, Spirea<sup>2</sup> transit and Spirea<sup>3</sup> models, to create the Rea<sup>™</sup> Spirea<sup>4</sup><sub>NG</sub>. A great all-round wheelchair, this model displays a wide range of options to cover the clinical needs of users and carers for optimal, everyday, use.

### **Corners and tight spaces? Not a problem for the Spirea 4NG**

With the Rea<sup>™</sup> Spirea<sup>4</sup><sub>NG</sub>, the bother of negotiating corners and narrow spaces is a thing of the past thanks to leg rests that swing snugly sideways or under the seat. Users will expend less energy getting around thanks to a unique cross-brace system with dual-directional stability that ensures lightweight, easy propelling.

### **Ready for the day? Just fold away**

At just 9.5 kg (without rear wheels) the Rea<sup>™</sup> Spirea<sup>4</sup><sub>NG</sub> easily folds away and can slide behind the front seats or into the boot of a car, making it easy to transport and rendering spontaneous day trips or quick outings wonderfully hassle-free for users.

### **Cross-range compatibility: good comfort, good financial sense**

As always with Invacare<sup>®</sup> products, user comfort and cross-range compatibility are top of mind. The Rea<sup>™</sup> Spirea<sup>4</sup><sub>NG</sub> is specifically designed for those permanently seated in their wheelchair and in need of good support; leg rests, back rests, seat height, arm rests, camber position and push handles can all be adjusted. Interchangeability of parts with other wheelchairs from existing Action<sup>3</sup>, Spirea<sup>2</sup> and <sup>3</sup>, SpinX and Focus ranges add to the broad appeal of the Spirea<sup>4</sup><sub>NG</sub>.

Aesthetic design is showcased in the lightweight, easy-to-maintain aluminium frame and sleek, slate-grey colour way. Models available include a standard, a transit and an active version.

Rediscover freedom of mobility... discover the Rea<sup>™</sup> Spirea<sup>4</sup><sub>NG</sub>.
